

Product Information

HYDROLENE 2G

Granular Wetting Agent

Hydrolene 2G delivers the synergies of 2 proven soil wetting agents in the one, easy to apply granule.

This unique product improves the soil/wetting/air relationship in all growing media, is easy to apply and sticks to the soil surface. Longevity up to 4 months.

Product Advantages

- Allows pine bark growing media to hold more water (WHC) without decreasing the air-filled porosity (AFP)
- Improves water use efficiency.
- Allows re-wetting of dry growing media.
- Assists in preventing water logging.
- Encourages optimal root development which enhances nutrient uptake.
- Improves plant uniformity.
- Helps to prevent algae, moss and liverwort growth on top of the pot.

Bag weight 20kg

Application Rates g/l (kg/m³)

	Incorporated	Top dressed
Maintenance	0.7	0.5
Remedial	1.0	0.8

Notes:

1. Spread evenly over the surface when top dressing
2. Fully effective after the second watering
